

Natural Law Core Foundational Principles of Truth as a Basis for Living evolveconsciousness.org

Foundational Basis for Being, living our lives and the way we choose to be. The Root Causal Factors for the condition of the world: a Foundational Core built on Principles of Truth or Axioms of false belief accepted and bought into

3 major aspects to look at:
 - base foundation of true or false core units
 - secondary units built on top in strength or weakness
 - the top of foundation also serves as a zero-marker for identifying if the secondary unit is built on more or less accurate perceptions of reality; above or directly into negative knowledge and falsity.

Hovering over a negative zone means not having directly built into the negative knowledge. The category of knowledge accumulated in that column or subject is not one founded upon a false foundation or premise. The blocks that are above the negative knowledge are connected to other parts of accurate knowledge based in known and accepted foundational principles of Truth. Principles of Truth are being used as the foundation to support the adjacent block and the choices, actions and behaviors that result from their acceptance. The block or connected concepts above a negative foundational basis are missing core understandings, pieces of the big picture, great pattern, yet obtained positive, right, good and true knowledge to create aspects of right-action.

Content 1 & 2 are at the same level & correspond in understanding to content 3 & 4 which are both lower in a level of accumulated knowledge, and are also concepts that are into negative knowledge, meaning they are erroneous beliefs accepted as truths, founded upon the more basic core aspects that are false.

Truth Level 1: What 'is' or has manifested in reality; what is existing or has existed.
 Truth Level 2: The Way of living in Truth, Love, Good, Right, Morality, Natural Law, True Self, Higher Self, Higher Will, etc.

Secondary conceptual blocks are made of several secondary concepts. Some particular concepts are founded in a faulty basis, being constructed over negative knowledge of the red blocks.

Secondary level understandings are based on the foundational core principles. If your additional conceptual construct and basis of knowledge for understanding reality is built on top of faulty red blocks that are empty of Truth, then you either have a structure built on a weak foundation of understanding in order to support its conclusion or you have built, not only on top, but into the negative zone. Building into the negative faulty knowledge and understanding of reality we make your constructs about reality and yourself sub-merged into negative knowledge to produce negative results of wrong-action.

The overall strength of the foundation for living life and building secondary understandings is determined by the refinement, clarity, quality, definition, integration, coherence, non-contradiction, non-conflict, non-oppositional, accurate, correct, optimal, right, good or true basis of our core foundational principle axioms.

Axioms and foundational basis for living is less integrated and connected. Foundation for being.

Axioms and foundational basis for living is more integrated and connected. Foundation for being.

We ask questions in life on what to do, how to behave, what actions to engage in, and contrarily what not to do. Right-action produces right results. Wrong-action produces wrong results. Our world is a reflection of the manifestations of action and behavior each of the individuated units of consciousness choose to generate. All of our actions to live in the world collect into an aggregate critical mass of behavioral mechanisms and ways of living. What we accept as true, right and good ways of conducting ourselves with respect to the other components in reality, universe and existence is what determines the world and secondary reality that we actively generate by our behaviors and choices in life.

It's all based on the core aspects of information and knowledge you have taken in that is represented by the different colored blocks that make up the foundational basis for living life. We build other understandings upon these core principle blocks that form our foundation for living. These can be accurate, correct, right, good and true pieces of data to build your dataset or datapool, the blue blocks. They can also be inaccurate, incorrect, wrong, bad and false aspects of understanding taken as truth, the red squares. They are bought into as valid methods of behaving in and thinking about reality, our worldview, and our self-image or concept of self that we have constructed so far by living amongst the variability, multiplicity and diversity in this universe, reality and existence.

If we have a faulty foundational basis for living our lives, then we will not be creating a world we want to live in through our choices, actions and behaviors. We will have accepted and bought into false axioms of belief. These erroneous beliefs are based on lies, deceptions and illusions. We continue to create results that are not in alignment, harmony, unity, integration, and cohesion with what is right, good and true, with Universal Cosmic Spiritual Natural Moral Law. The quality of the information and knowledge we intake will output as a method of living in the world in degrees, grades and levels of alignment and embodiment with optimal core foundational principles of truth based in Natural Moral Law. What we input is what we output, and what we output is what we get back as an aggregate qualitative effect of everyone combined. Cause and effect. Reaping what is sowed. This is how it works on the mass scale. Each individuated unit is a part of the whole that is created. As each unit changes, and more units share core foundational principles in common, the greater the potential for the overall condition of the world to be based on those solid, accurate, correct, right, good and true foundations. The greater each unit aligns with core foundational principles of Natural Moral Law, the greater the potential unity and strength of relationships to be built. A commonality in understanding important truths and values to live by will build that type of future. Those that perpetuate and participate in direct violations of Natural Moral Law are participating in creating more wrongdoings in the world.
