the boundaries of Natural Laws, True Positive Evolution blossoms.

We exist both inside the universe and the boundaries that maintain it.
We can try to step outside of the boundary Law conditions, but we will
only create self-inflicted suffering. We don't live outside of them, we
only want to believe we can live outside of them in delusion & fantasy.

Natural Laws, negative devolution happens in false living.

You cannot "square the circle" perfectly in geometry. The circle has an
indefinite area, while the square's is definite. This is symbolic of man's
attempt to do things we can't, to create "laws" for ourselves and
stepping out of bounds, thinking we can do something we can't.
